

Katharine Heyl has been a member of the Research Unit Sustainability and Climate Policy since 2019. Since October 2022, she works as research assistant of the BonaRes-project InnoSoilPhos (Innovative Solutions to Sustainable Soil Phosphorus Management). There, she primarily analyses and evaluates new EU legislation on recycled phosphorus fertilisers and researches the interaction of economic and command-and-control instruments of phosphorus governance. Previously, Katharine worked as research assistant at the Leibniz ScienceCampus Phosphorus Research Rostock, which is formed by different institutes including the Research Unit Sustainability and Climate Policy. Her PhD thesis focuses on the Common Agricultural Policy of the European Union and the potential contribution of subsidies to sustainability governance in general and phosphorus governance in particular. Katharine Heyl holds a Master's degree in International Urban and Environmental Management (Royal Melbourne Institute of Technology).
